2. Water Quality - 55 Potential Points (20 % of Total)

A. Surface Water Pollutants - 30 Maximum Points

There is a probability that runoff water from irrigated fields contains sediment, salt, pesticides, and/or nutrients (or other associated chemicals). Treatment is needed to prevent these pollutants from entering live waters, or re-entering a shared irrigation system. Points will be awarded based on distance from the end of the field to the nearest live waters or re-entry point into a shared system. If there is no run-off, after points will be 0.

Distance of Surface Run-Off to Live Water	Potential	Benchmark	After
Distance of Surface Run-Off to Live Water	Potential Benchmark Points Points 30 0 20 0 10 0 5 0 0 0	Points	
<100 Feet	30	0	
101 - 500 Ft.	20	0	
501 - 1,320 Ft.	10	0	
1,321 - 2,640 Ft.	5	0	
>2,640 Feet	0	0	
A. Surface Wat	er Total	0	

B. Ground Water Pollutants - 25 Maximum Points

There is a probability that irrigation water containing salt, pesticides, and/or other nutrients (or other associated chemicals) is leaching into the ground water. Treatment is needed to prevent these pollutants from contaminating ground water, through leaching and/or direct flow into wells. Points will be awarded based on depth to the water table or elimination of any direct discharge to ground water (regardless of depth to the water table).

Depth to Water Table	Potential	Benchmark	After
Deptir to Water Table	Points	Points	Points
1 - 10 Ft or elimination of any direct discharge into ground water.	25	0	
10 - 50 Ft.	15	0	
50 -100 Ft.	10	0	
>100 Ft.	0	0	
B. Ground Wa	ter		
2. Water Qual	ity Total	0	

3. Selected Conservation Practice(s) - 80 Potential Points (25-50% of Total)

Any practice used in the ranking criteria and intended to be included in the conservation schedule of operations must be cost-shared or have an incentive payment. Higher priority (value) should be given to those practices which address multiple resource concerns, are cost effective, and have longer life spans. Select resource concerns from NM Quality Criteria Guide.	Potential Points	Percent of Need to be Installed	After Points
Water Quantity - Water Management for Irrigated Land			
Drip Irrigation Systems	25		
Sprinkler Irrrigation System	20		
Irrigation Pipelines	20
